The Signal Splitter/Repeater GN 21000 is used for isolation, conversion and distribution of 0/4 ... 20 mA, 0/1 ... 5 V and 0/2 ... 10 V standard signals. The measuring input can also supply the loop power for 2-wire transmitters.

The input and two isolated outputs can be easily configured by using DIP switch. Due to the calibrated range selection no further adjustment is necessary.

The auxiliary power can be supplied via the connection terminals or via the optional In-Rail-Bus connector. A green LED on the front of the unit has been provided to monitor the power supply.

- **Universal configurable operating**
  Signal isolator or repeater power supply for 2-wire transmitters, 2 independent outputs

- **Calibrated signal setting**
  Input and outputs can be set by using DIP switch – high precision without any further adjustment

- **4-Port isolation**
  Protection against erroneous measurements due to parasitic voltages or ground loops

- **Extremely slim design**
  6.2 mm slim housing for a simple and space saving DIN rail mounting

- **Optional In-Rail-Bus mounting rail connector**
  allows for fast and economical installation

- **Protective Separation acc. to EN 61140**
  Protects service personnel and downstream devices against impermissibly high voltage

- **Maximum reliability**
  No maintenance costs

- **5 Years Warranty**
  Defects occurring within 5 years from delivery date shall be remedied free of charge at our plant (carriage and insurance paid by sender)

**Linear transmission range**

-1 ... +110 %

**Ripple**

< 10 mVrms

**General Data**

**Transmission error**

< 0.1 % full scale

**Temperature coefficient**

< 100 ppm/K

**Cut-off frequency** -3 dB

5 kHz

**Response time** $T_{99}$

150 μs

**Test voltage**

3 kV AC, 50 Hz, 1 min. Input against Output I against Output II against power supply

**Working voltage** [Basic Insulation]

Up to 600 V AC/DC for overvoltage category II and pollution degree 2 acc. to EN 61010-1 between all circuits.

**Protection against electrical shock**

Protective separation according to EN 61410 by reinforced insulation in accordance with EN 61010-1 up to 300 V AC/DC for overvoltage category II and pollution degree 2 between all circuits.

**Ambient temperature**

Operation: -25 °C to + 70 °C (-13 to +158 °F)

Transport and storage: -40 °C to + 85 °C (-40 to +185 °F)

**Power supply**

24 V DC voltage range: 16.8 ... 31.2 V DC, approx. 1.4 W

**EMC** [3)

EN 61326-1

**Construction**

6.2 mm housing, protection class IP 20, mounting on 35 mm DIN rail acc. to EN 60715

**Weight**

Approx. 70 g

---

1) Average TC based on final value in specified operating temperature range

2) As far as relevant the standards and rules mentioned above are considered by development and production of our devices. In addition relevant assembly rules are to be considered by installation of our devices in other equipment. For applications with high working voltages, take measures to prevent accidental contact and make sure that there is sufficient distance or insulation between adjacent situated devices.

3) Minor deviations possible during interference
